

# Unforeseen Circumcisions Coin (SNIP)

## Introduction

Welcome to the world of Unforeseen Circumcisions (SNIP), the memecoin that's here to cut through the noise with a slice of humor and a dash of deflationary fun! Born from a classic typo on a restaurant closing poster, SNIP embraces the unexpected and turns it into a unique crypto experience.

## The Story Behind SNIP

"Is there anything worse than an unforeseen circumcision? One day you're just chilling, minding your own business and then SNIP! You lose a part of yourself. Doesn't that suck? We thought so too, and that's why we created SNIP. It's a coin that embodies the unexpected twists and turns of life, with a humorous twist."

## How SNIP Works

SNIP is a deflationary memecoin designed to keep you on your toes[foreskin]. Every transaction triggers a small "snip," reducing the total supply and making every remaining SNIP more valuable. Here's the rundown:

- Total Supply: 1,000,000,000 SNIP
- Transaction Fee: 6% per transaction
  - 2% Burn when buying: A portion of every transaction is permanently removed from the supply. SNIP gets scarcer over time.
  - 4% Burn when selling: A portion of every transaction is permanently removed from the supply. SNIP gets even scarcer over time when selling
  - 1% Development Fund: Ensures continuous improvement and marketing efforts.
  - 1% Additional Sales Tax: Think of it as a "foreskin fee" – just a little extra cut to keep things interesting!

## Why SNIP?

- Memorable and Fun: Let's face it, the name is unforgettable and brings a smile to your face.
- Deflationary Model: Every transaction triggers a small "snip," reducing the total supply and making every remaining SNIP more valuable.

- Community-Driven: SNIP is all about building a fun, engaging community. We want to laugh with you, not at you.
